PROJECTS

- [Client Management System](#) | MongoDB, ExpressJS, NodeJS, ReactJS, Zod, Mongoose, TailwindCSS
 - Developed a Client Management System in which the user of the website can add and manage their client and their demo Date(s).
 - Created two portals, admin and user wherein admin can add client and add new demo dates for client and also create a user and user can go check client's demo dates.
 - Used **Recoil** for state management and **jsonwebtoken** to authenticate the user.
- [HiveDeal](#) | MongoDB, ExpressJS, NodeJS, ReactJS, Formik, Yup, React-router, Redux, TailwindCSS
 - Collaborated on the development of an e-commerce website using the **MERN** stack (MongoDB, Express.js, React.js, and Node.js).
 - Implemented **admin** and buyer functionalities, wherein admin can **add and remove products** and view some other stats.
 - Also a buyer can search and buy products, view his profile and has been given carts wherein he can add products, increment & decrement and remove products
- [NetflixGPT](#) | React, React-router, Firebase, Redux-toolkit, TailwindCSS, OpenAI GPT API
 - Developed a responsive frontend website like Netflix using React.js and Tailwind CSS, ensuring an intuitive user interface and seamless navigation across devices.
 - Integrated an advanced recommendation system powered by **OpenAI's GPT** technology, leveraging Redux Toolkit for state management and **React Router** for dynamic routing.
 - Utilized **Firebase** for backend functionalities, including authentication, real-time data storage, and API integration, while also fetching movie data from the **TMDB** website, ensuring a comprehensive and up-to-date catalog of available content for users.
